

QueueNora™ CareFlow

Run your clinic day on your phone.

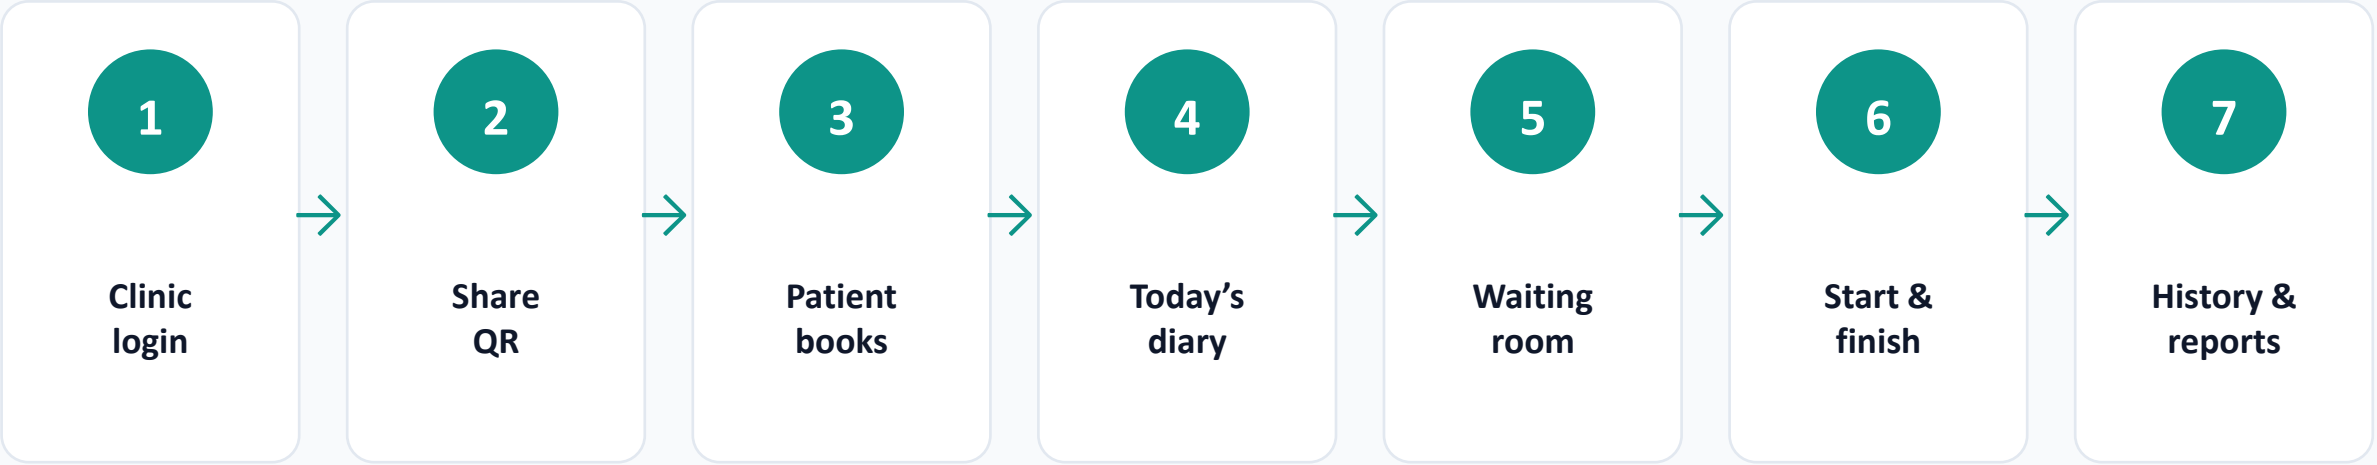

Login → QR booking → Today's diary → Waiting room → Consult → Patient history.
A short walkthrough for clinic owners and doctors.

The screenshot shows the QueueNora CareFlow Clinic login interface on a mobile device. At the top, the QueueNora logo is displayed, followed by the text "QueueNora™ CareFlow · Clinic" and "For doctors, staff and administrators". Below this, there is a "Sign in" section with the instruction "Sign in with your clinic account, or create one to start a clinic." The "Email address*" field contains "doctor@careflow.local". The "Password*" field is masked with dots and has an eye icon to toggle visibility. Below the password field is a green "Sign in" button. Underneath the button is a link "Create a clinic account". A horizontal line with the word "or" in the center separates the login options. Below this is a "Continue with Google" button. At the bottom, there is a link "See how CareFlow keeps your clinic safe (no login needed)" and a footer section with links "Details anytime: Privacy · Terms · AI & care · Working together". The final line of text at the bottom states "Patients sign in on the CareFlow patient app with their mobile number."

Clinic onboarding presentation · Real app screens

One simple flow

Everything the clinic and patient do — in order.

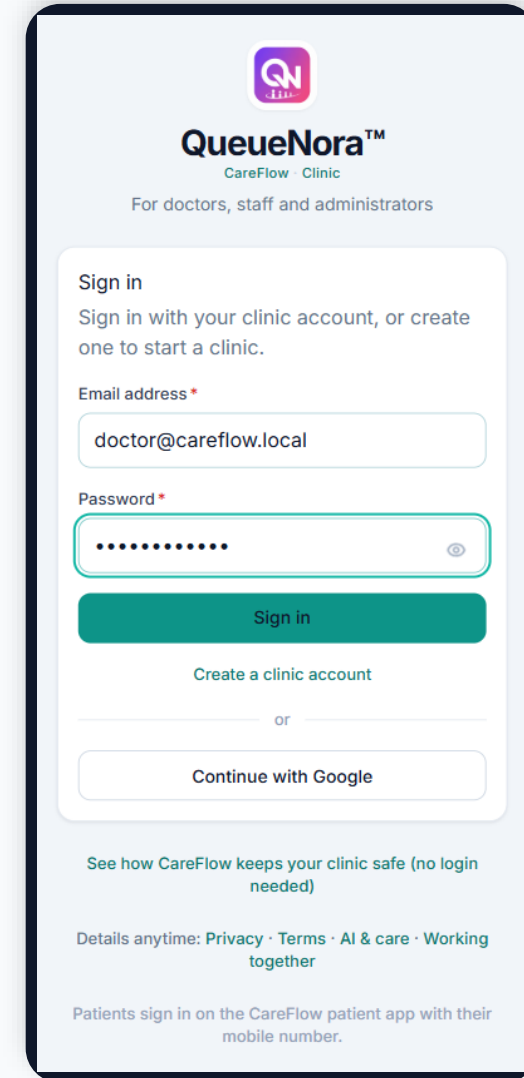

Next slides show each step with the real CareFlow mobile screens.

Step 1

Clinic login — ready in under a minute

Doctors and staff sign in with email + password (or Google). No long setup before first use.

- Same app for doctor, staff, and owner
- Hindi + English on every screen
- Works on phone — front desk and consulting room
- After login: today's board opens immediately

The screenshot shows the QueueNora™ CareFlow Clinic login interface. At the top is the QueueNora™ logo with the tagline 'CareFlow · Clinic' and the text 'For doctors, staff and administrators'. Below this is a 'Sign in' section with the instruction 'Sign in with your clinic account, or create one to start a clinic.' It features input fields for 'Email address *' (containing 'doctor@careflow.local') and 'Password *' (masked with dots). A teal 'Sign in' button is positioned below the password field. Underneath is a link to 'Create a clinic account', followed by a horizontal line with the word 'or' in the center. Below this is a 'Continue with Google' button. At the bottom, there is a link to 'See how CareFlow keeps your clinic safe (no login needed)', a footer with links for 'Privacy · Terms · AI & care · Working together', and a note stating 'Patients sign in on the CareFlow patient app with their mobile number.'

Step 2

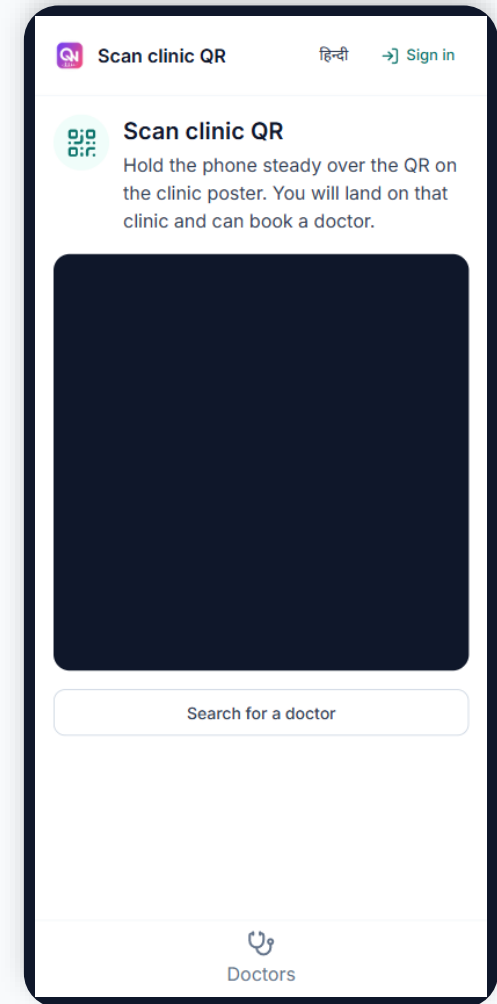

Clinic QR → patient scans → books

Print once. Stick on the wall / WhatsApp / pamphlet. Patient never types your clinic name.

- Clinic gets a printable QR poster in-app
- Patient opens camera → CareFlow clinic page
- No app store required — mobile web / PWA
- Booking starts from your clinic, not a marketplace list

Clinic QR

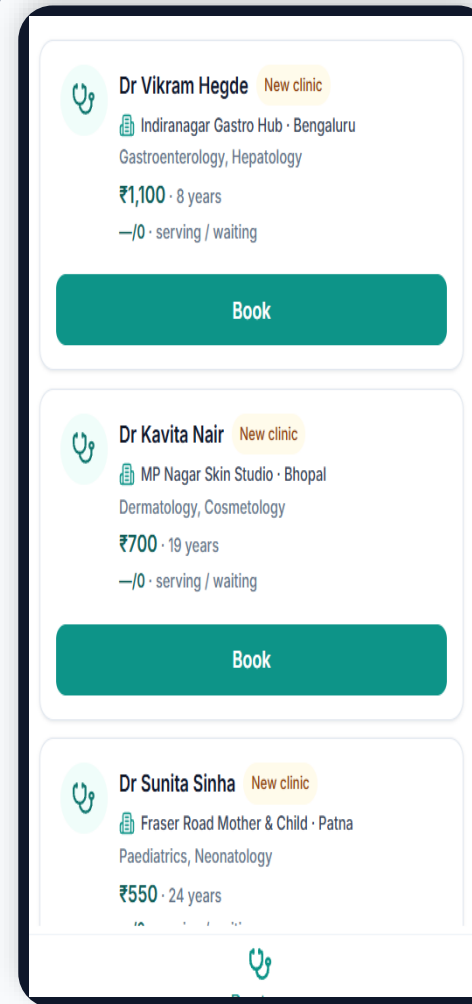

Patient scan

Step 3

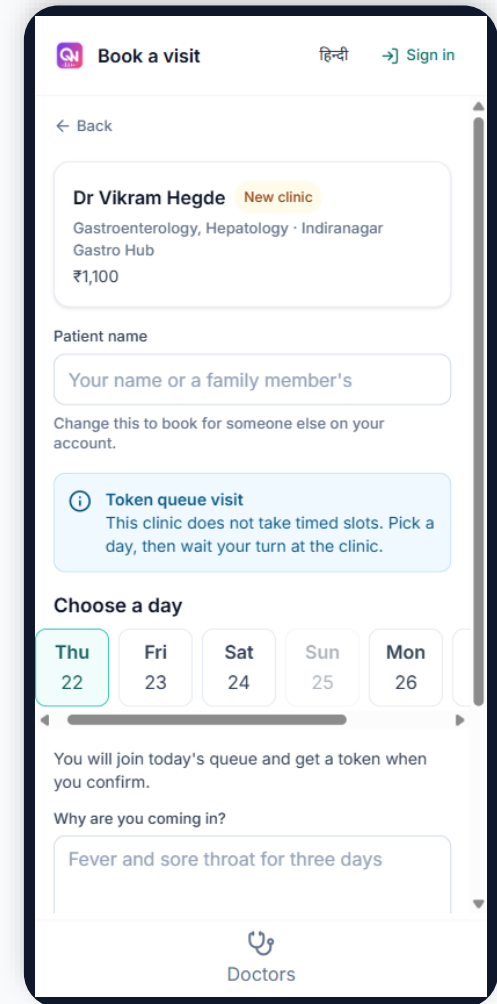

Patient finds the doctor & books easily

Search by name / city / specialty — or land directly from QR. Pick a day, get a token.

- Browse doctors without signing in first
- Sign-in only when confirming the visit (OTP)
- Token queue or timed slots — matches how you work
- Optional reason helps the doctor prepare

Doctor list

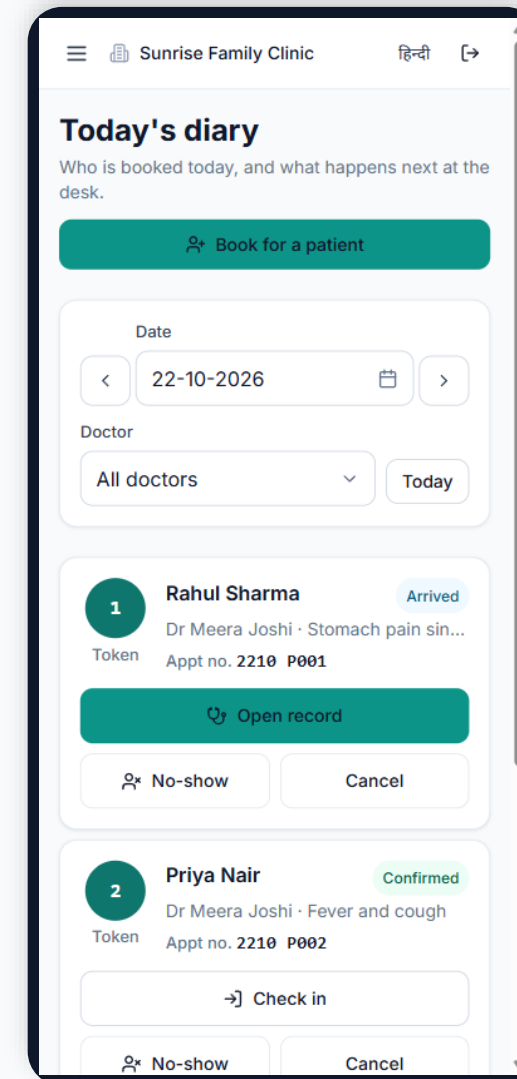

Book visit

Step 4

Today's diary — who is booked, what next

Front desk sees tokens, status, and one-tap check-in. No paper register.

- Filter by doctor and date
- Check in arrivals in one tap
- Book walk-ins for a patient from the same screen
- Open the patient record before they sit down

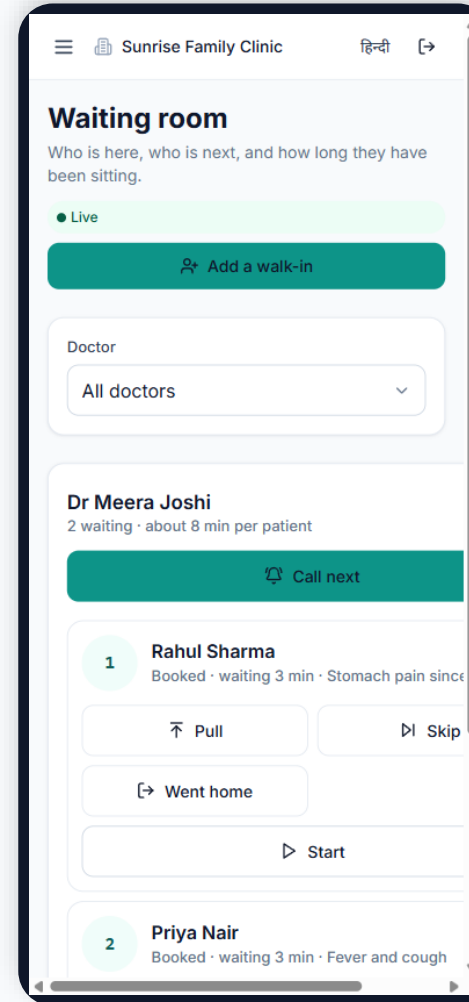

Step 5

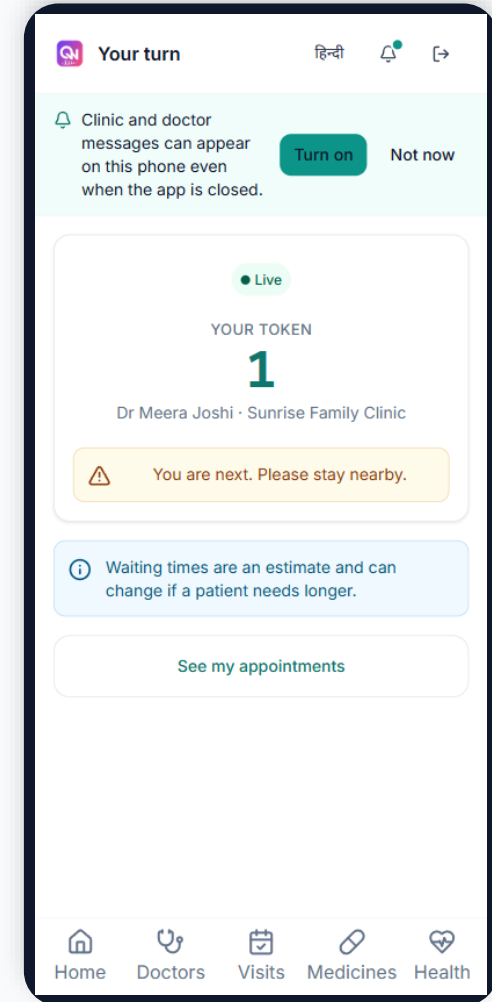

Live waiting room — clinic + patient

Clinic calls the next patient. Patient sees their token live — less crowding at the door.

- Call next / Start / Skip / Pull ahead
- Add walk-ins without a prior booking
- Patient phone shows “You are next”
- Estimated wait — calm, not countdown pressure

Clinic board

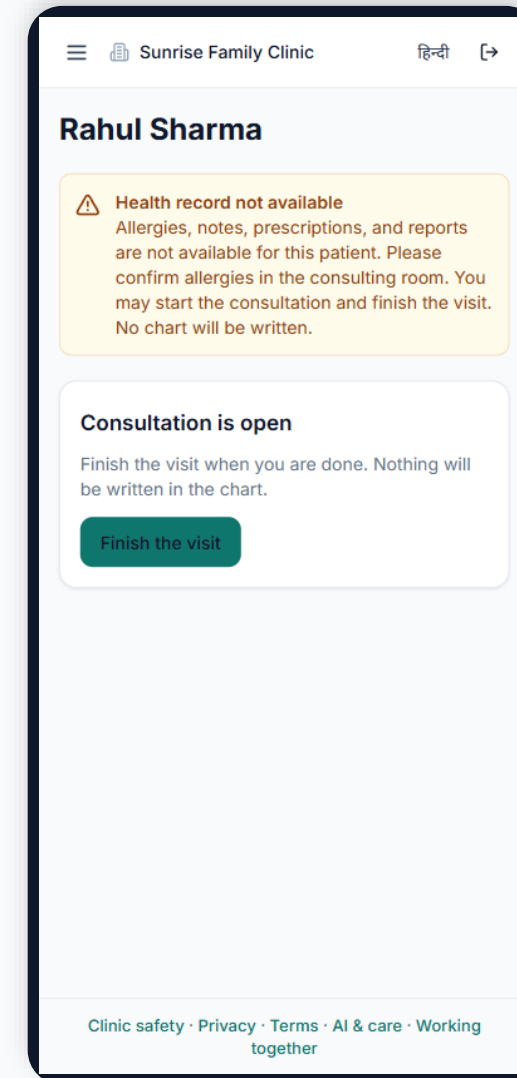

Patient token

Step 6

Doctor starts — and finishes — the visit

From the waiting room: Start consultation. When done: Finish the visit. Clear and fast.

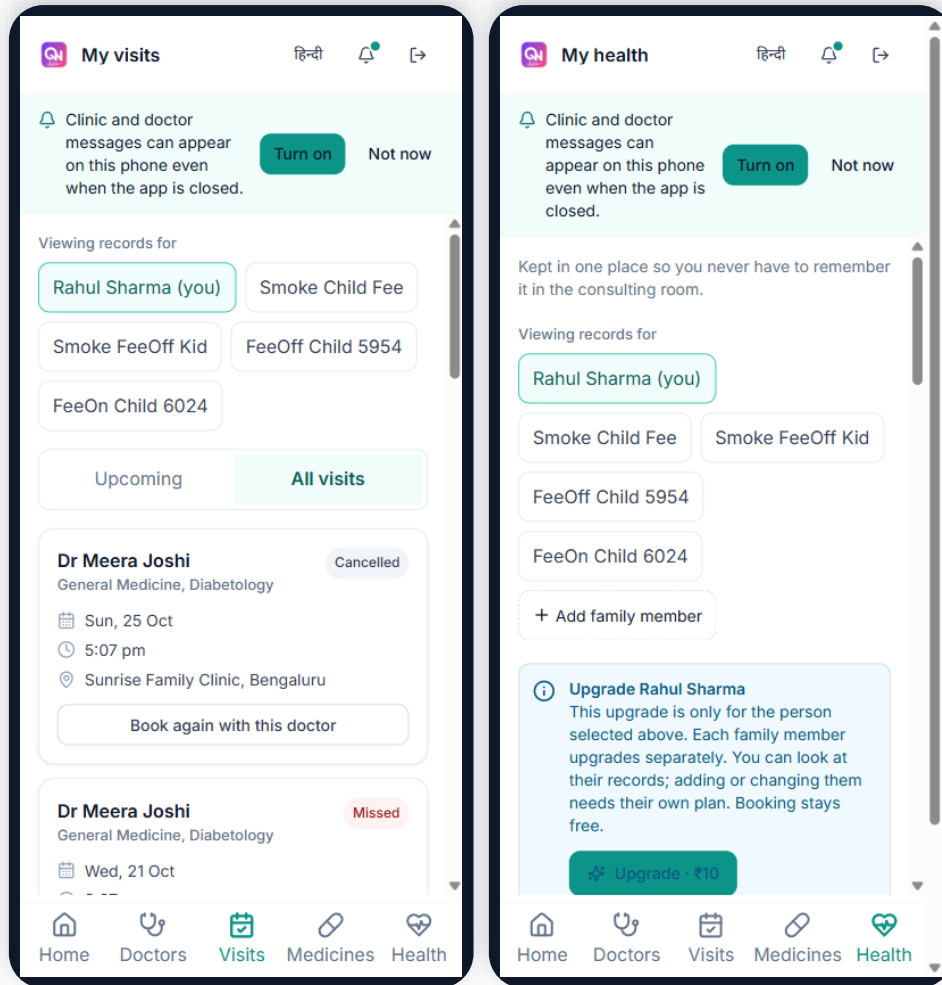

- One primary action: Start / Finish
- Patient context from intake & past visits when unlocked
- Safety prompts when record is not yet available
- Built for phone — also works on tablet / laptop

Step 7

Patient keeps history, visits & medicines

Patients stop carrying plastic folders. Family profiles live in one phone.

Ready to go live?

1. Create clinic account & invite doctors
2. Print your clinic QR for the wall
3. Run today's diary + waiting room
4. Patients keep coming back with history
